01 / CAPTURE

Capture

A native, scrollable sheet keeps meal details, photos and waking-day assignment together.

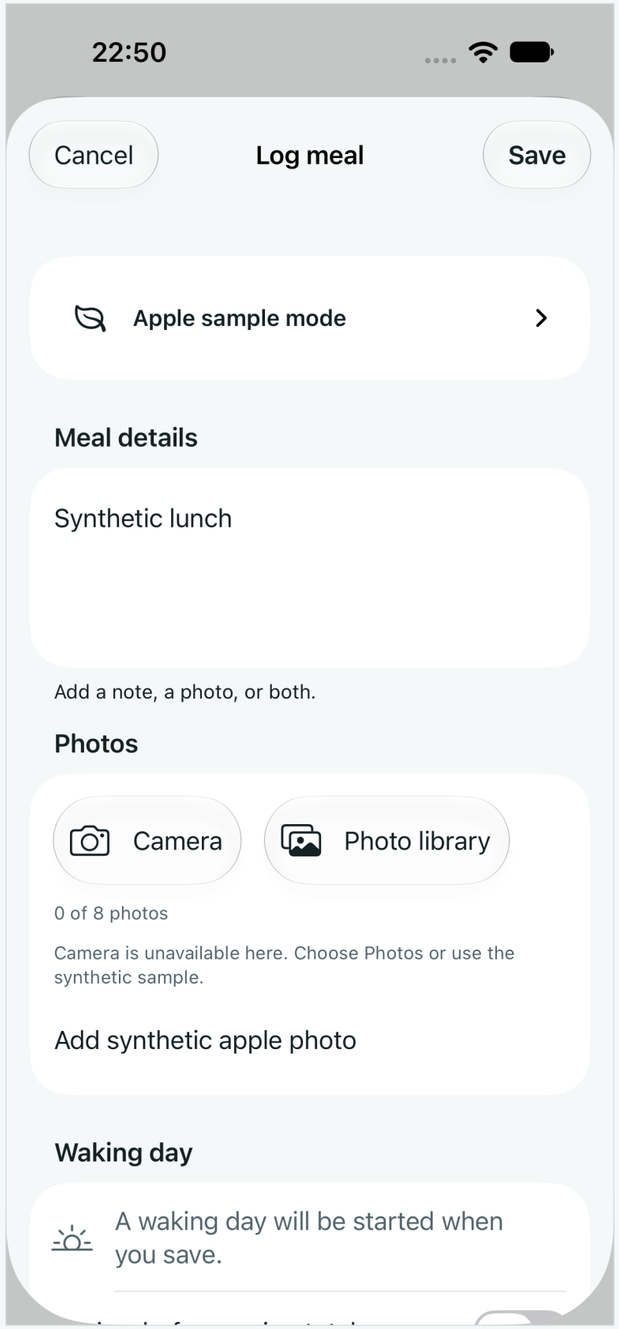

PURPOSE

Capture supports either a short note, a photo, or both, with Save and Cancel in the system toolbar.

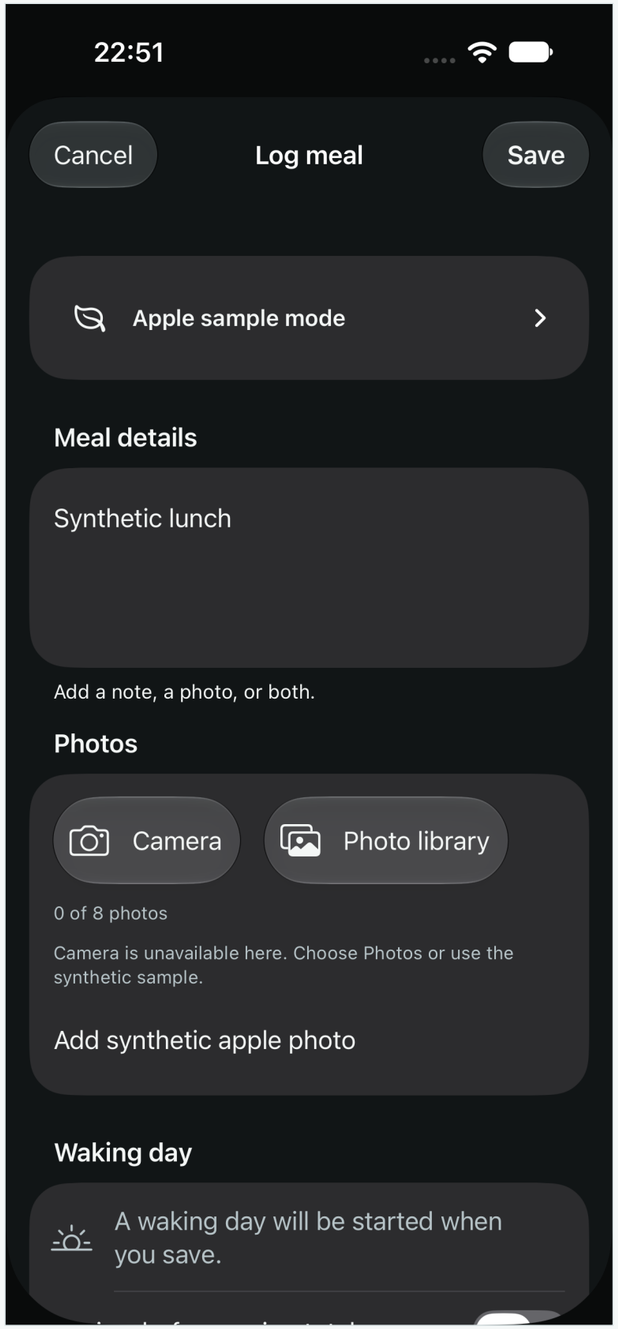

REVIEW LENS

- Keep Save and Cancel easy to find while the form scrolls.
- Make note and photo attachment equally clear as ways to record a meal.
- Keep destination and time controls reachable with the keyboard open.

LIGHT

DARK

02 / TODAY

Today

The active waking day leads with recorded intake, then moves into meal records and daily actions.

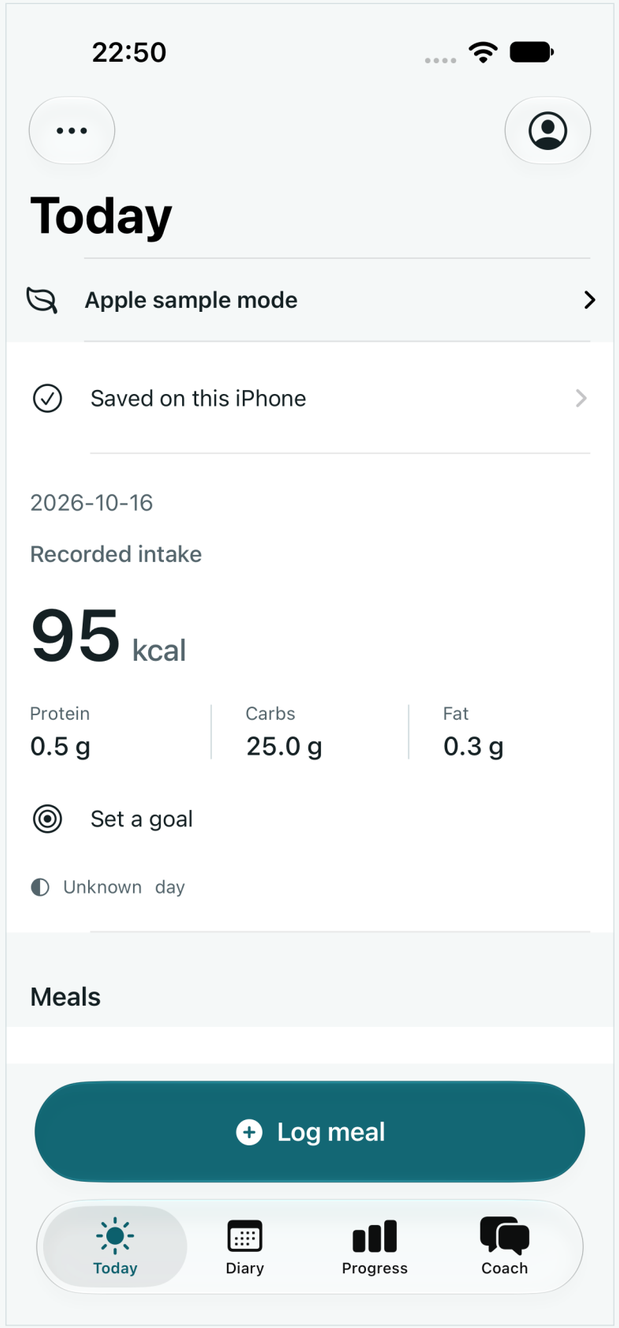

PURPOSE

Energy, macros and day completeness establish context above the meal ledger. A pinned, opaque Log meal action sits in its own inset, separated from the scrolling records.

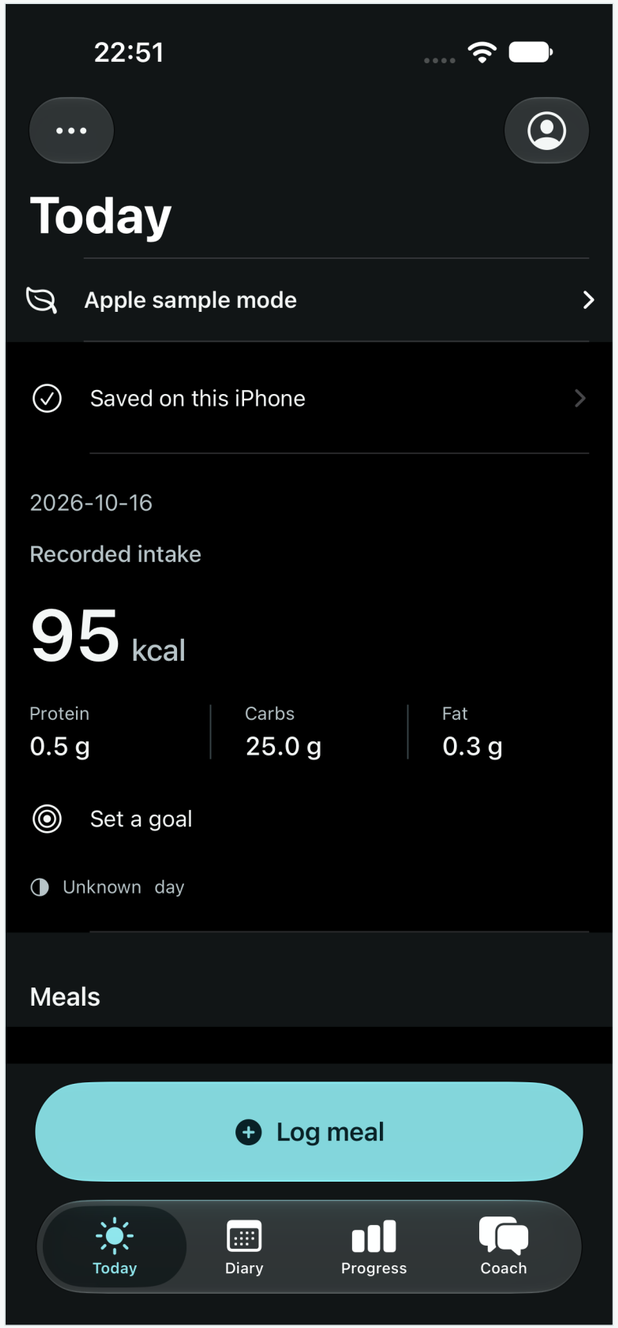

REVIEW LENS

- Keep energy and macros aligned with clear units.
- Keep sample provenance and unknown coverage explicit.
- Separate the pinned capture action from the scrolling meal content.

LIGHT

DARK

03 / DIARY

Diary

The history list makes recorded days scannable before opening a day for its meals and details.

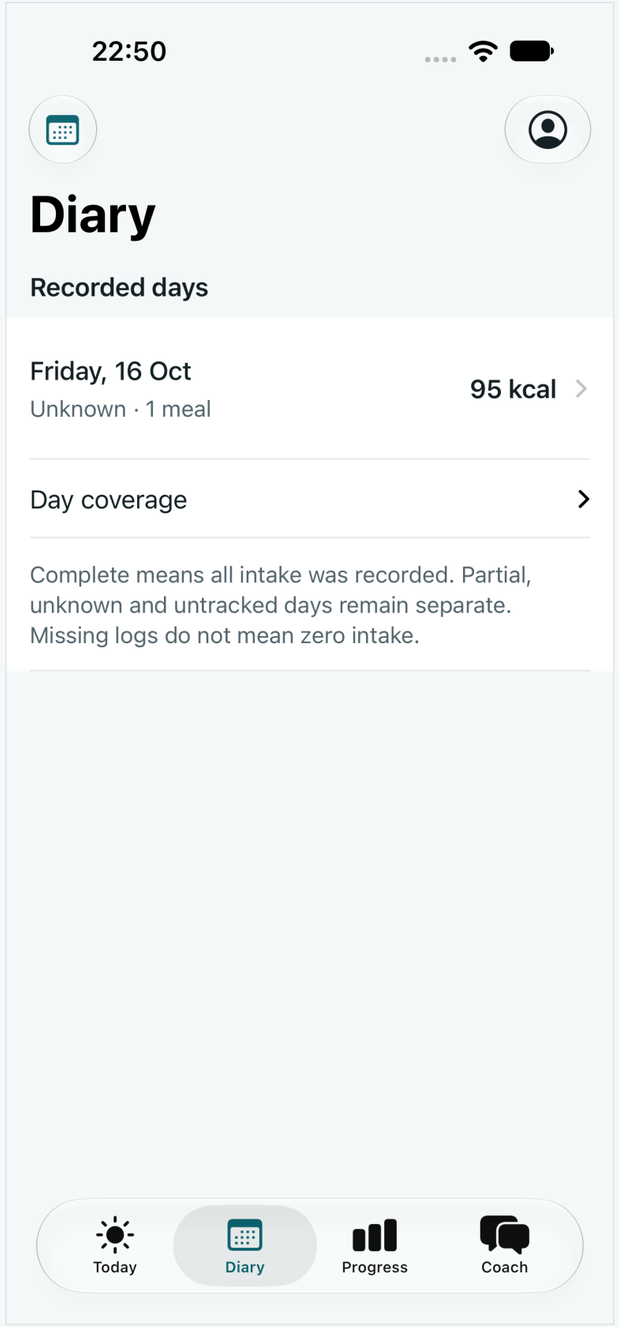

PURPOSE

Day totals sit beside date and meal count; the coverage explanation distinguishes incomplete records from zero intake.

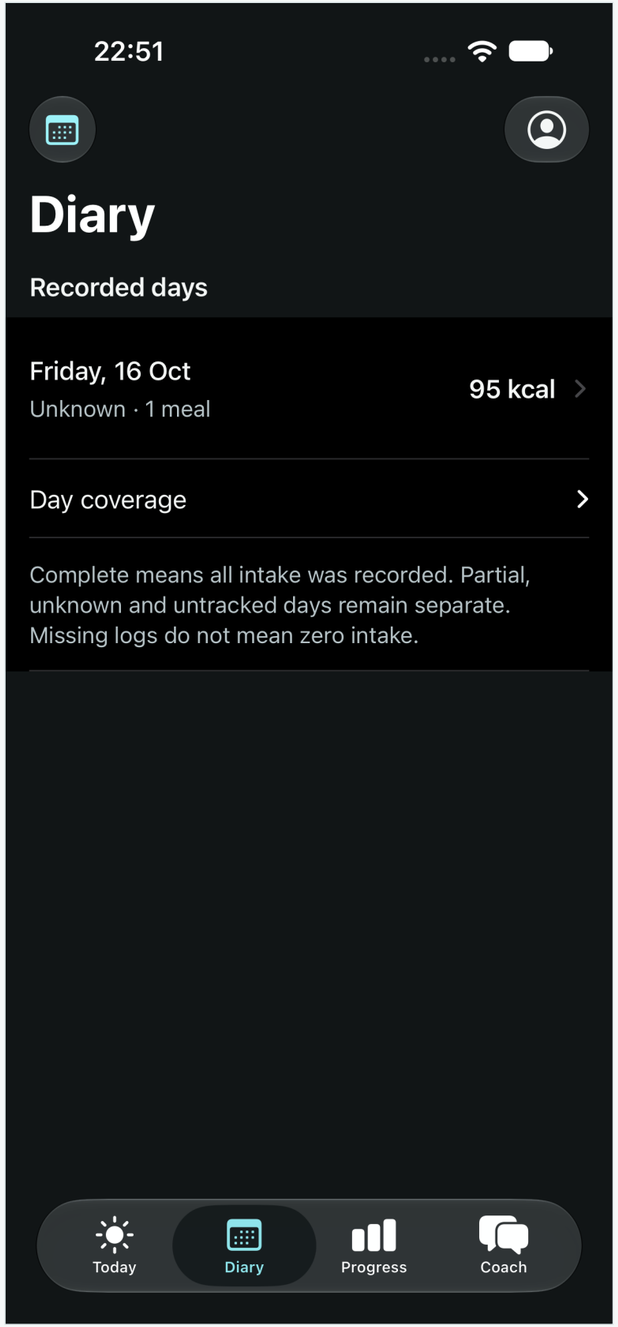

REVIEW LENS

- Keep date, completeness and known energy visible together.
- Preserve separate Partial, Unknown and Untracked states.
- Use day detail as the route to records and their provenance.

LIGHT

DARK

04 / PROGRESS

Progress

Period controls frame the intake summary and trend, with completeness called out as part of interpretation.

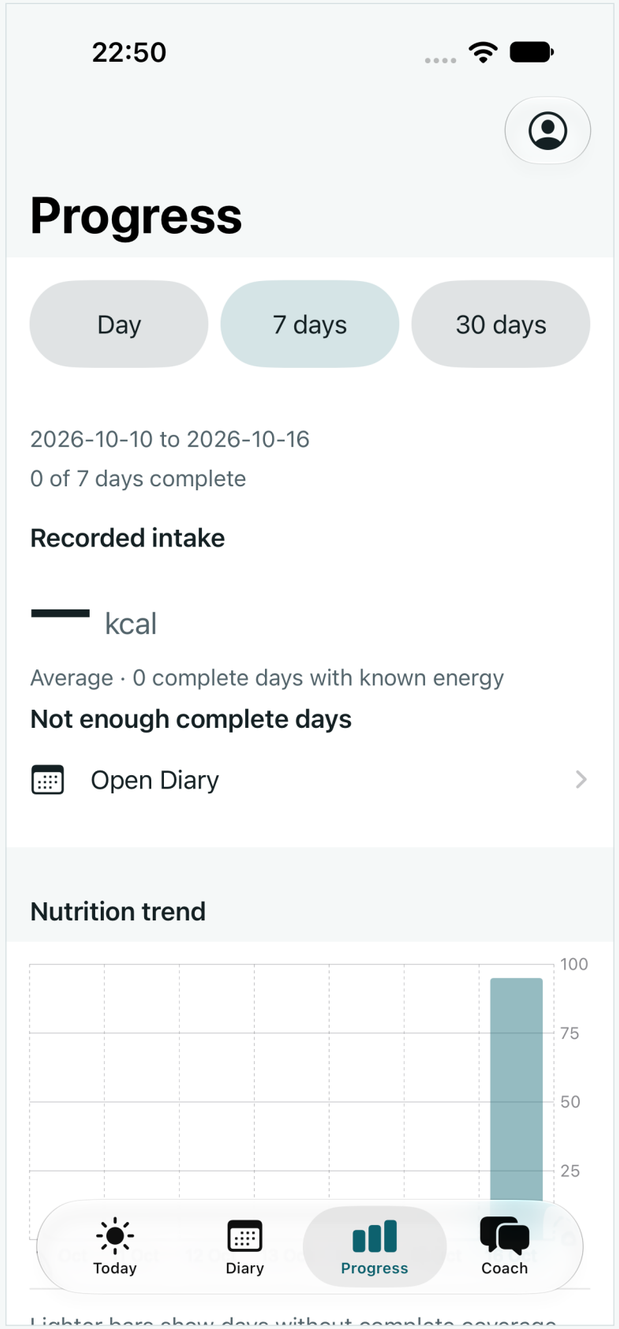

PURPOSE

The view reports how many days are complete and avoids presenting missing intake as zero.

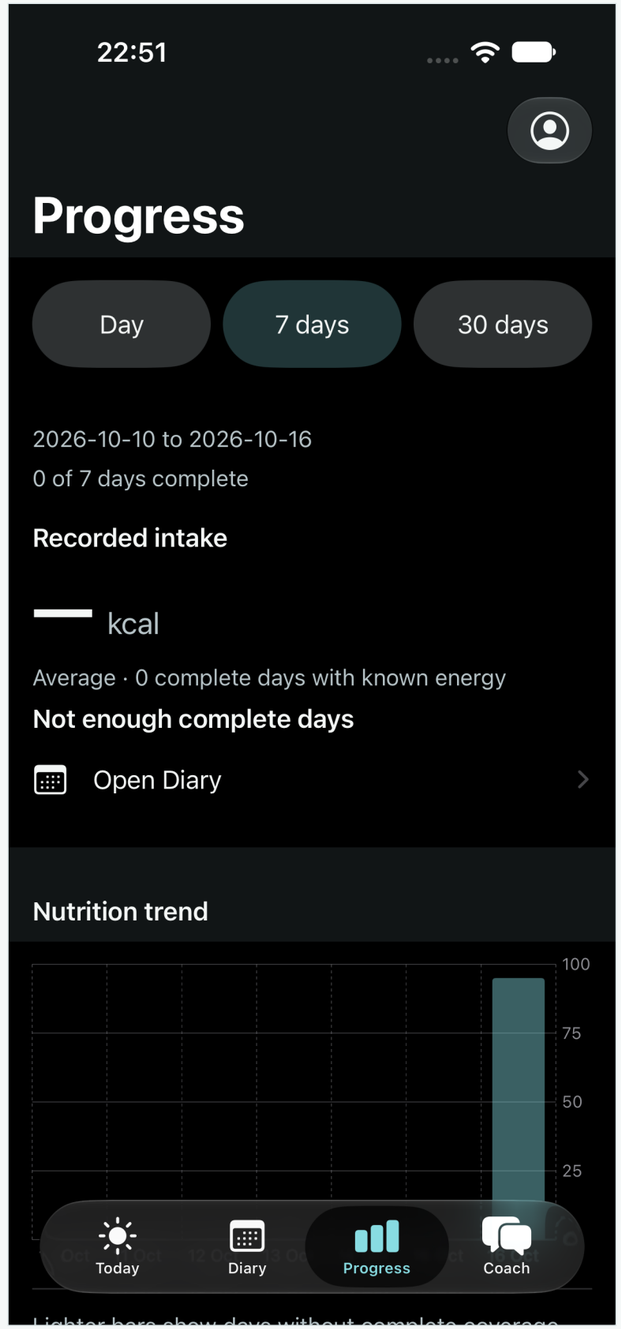

REVIEW LENS

- Keep the selected period and date range explicit.
- Tie averages to complete days with known energy.
- Pair chart marks with readable labels and context.

LIGHT

DARK

05 / COACH

Coach

A single conversation surface gives context, capture options and a stable message composer.

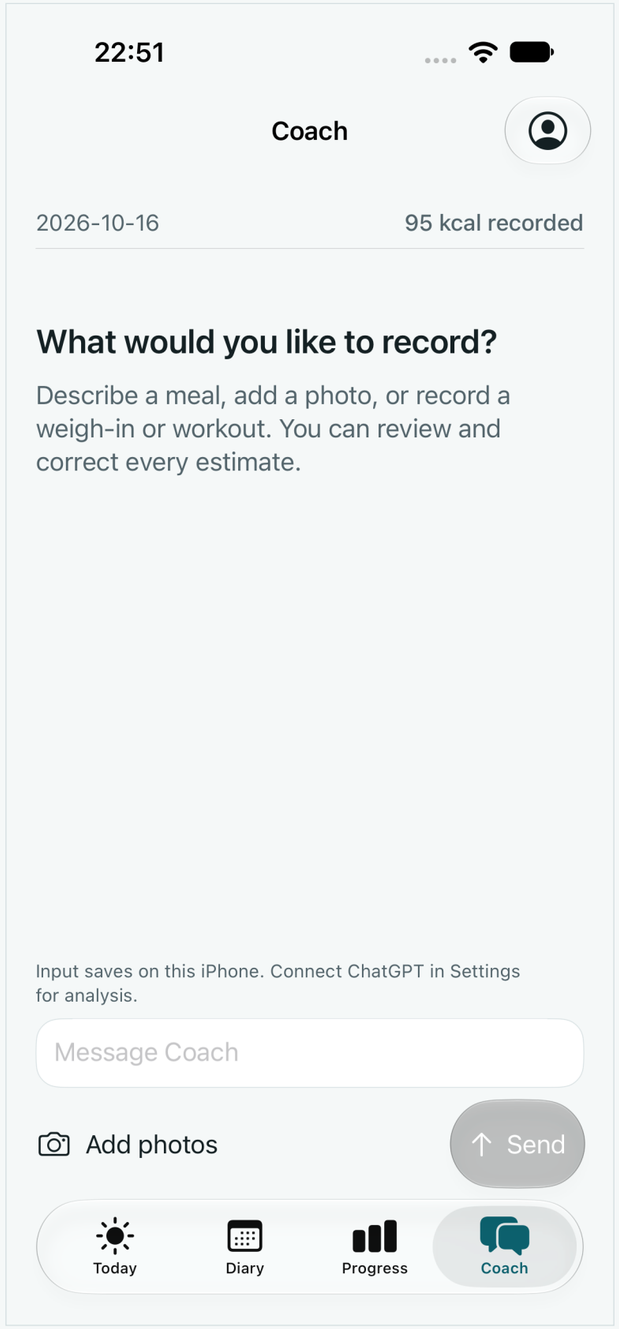

PURPOSE

The screen explains local saving and the optional connection, then offers a composer for meal, weight or workout input.

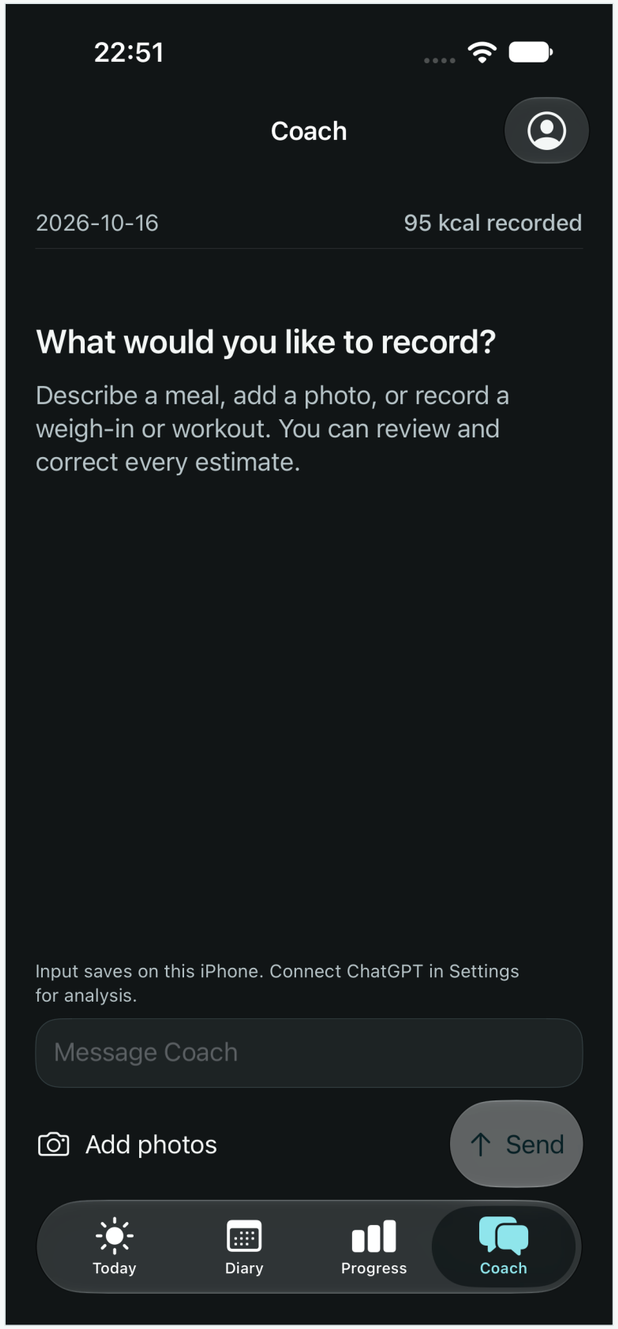

REVIEW LENS

- Keep local persistence distinct from remote analysis.
- Keep the disabled Send state clear when input is empty.
- Retain room for conversation history and linked saved records.

LIGHT

DARK

06 / SETTINGS

Settings

A private profile entry point groups goals, diary preferences, backup, connection and nutrition source.

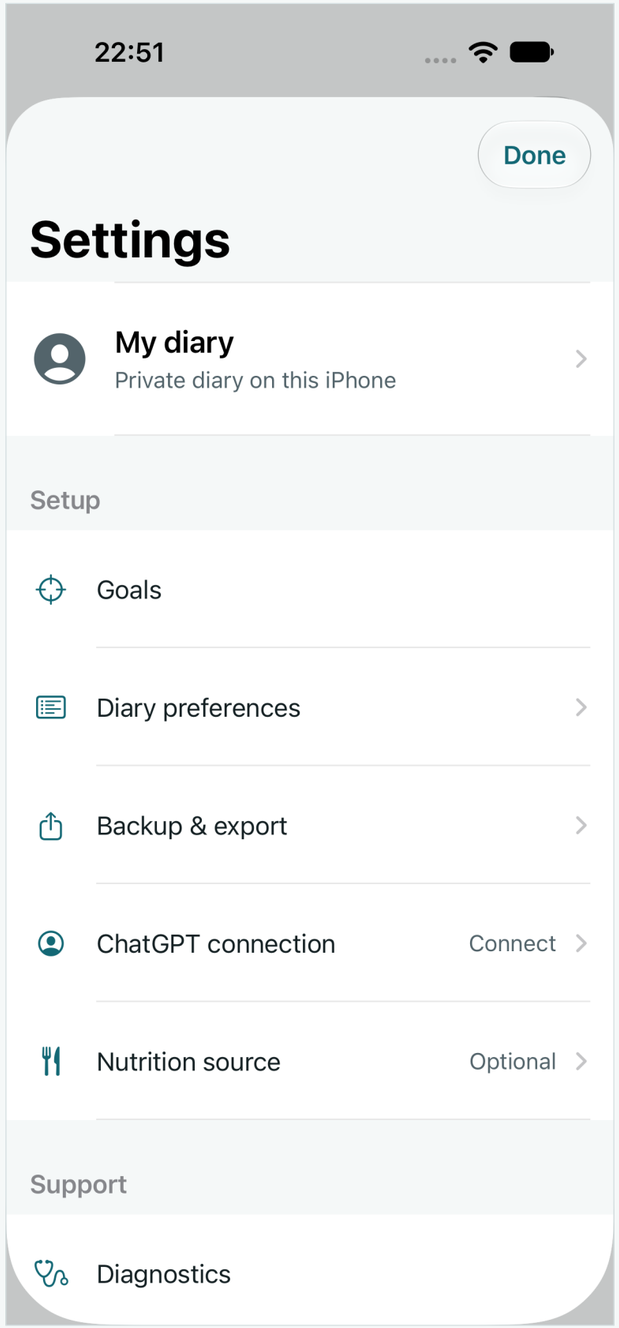

PURPOSE

Settings uses familiar native rows and short current-state summaries to keep maintenance tasks discoverable.

REVIEW LENS

- Keep profile scope and on-device storage visible.
- Use concise labels and meaningful state summaries.
- Protect unsaved settings and drafts during navigation and dismissal.
